Hands-free smart lock for toilet cubicles

Faucets, soap, flush valves, dryers, and dispensers all went touchless. The toilet partition latch didn't...

Meet the Hy® Lock.
Make any washroom cubicle hands-free and self-opening.

Hy® Lock: Satin Aluminum · Matte Black

Everything you trust today.

- Manual turn knob
- Works with no power
- Occupancy indication
- Meets global accessibility standards (US, EU, AUS, ...)
- In- or out-swing doors
- Exterior emergency release

Forgot to change the batteries this year? It still works like a normal indicator latch. Standard 4×AA last 1+ year, about 10,000 cycles.

With the hands-free experience patrons expect everywhere else.

Hands-Free: Wave to lock and unlock

Door swings open for you

Beyond accessible.

Hygiene, Hospitality, Accessibility at the wave of a hand

Protect Every Patron

Cut cross-contamination and germ spread. Two latch touches per visit, both before handwashing. Now, zero.

Elevate Every Visit

Deliver the five-star, touch-free visit that brings guests back.

Include Every Body

Set a new standard for accessibility. Every patron, of every ability, gets in and out with a wave.

The last touchpoint, gone.

Easy to use. Easy to own.
